DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jantzen (U.S. Patent No. 3,857,531) in view of Tsuyuki et al (U.S. Patent Application Publication No. 2001/0028010).

With respect to Claims 1-15, Jantzen, Figures 1-6, teaches a cartridge 10 comprising a tape; a reel 16 having a reel hub 18, the reel hub having a cylindrical recess portion; a case which accommodates the reel such that the reel is rotatable; a reinforcing ring 20 being a member separate from the reel hub. Jantzen teaches all the elements of the cartridge except for a braking member. However, Tsuyuki et al, Figures 1-7, teach a braking member able to move between a locking position and a non-locking position. It would have been obvious to one of ordinary skill in the art to provide Jantzen with a braking member, as taught by Tsuyuki et al, for the purpose of immobilizing the reel within the cartridge thereby preventing damage to the reel while the cartridge is not in use.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
